

DevBridge Console — Nord Aurora Theme

Screen-by-screen mockups (same IA, different theme). Includes search, filters, empty/error states, and dashboard placement.

Theme Tokens

	Background: #2E3440		Success: #A3BE8C
	Surface: #3B4252		Warning: #EBCB8B
	Surface 2: #434C5E		Danger: #BF616A
	Accent: #88C0D0		Text: #ECEFF4
	Accent 2: #81A1C1		Muted: #D8DEE9

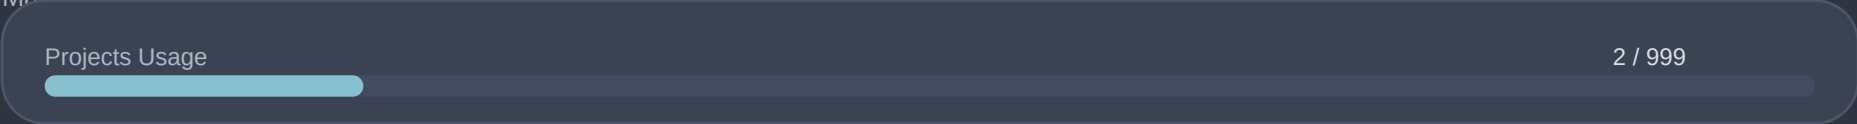

Global UX Rules

- Top-level search always scoped (Org → Project → Module).
- Tables: sticky header, column sort, inline filters, server-side pagination, keyboard shortcuts (/ to focus search).
- Dashboards: default 'Insights' landing per project with aggregated KPIs + drilldowns; module tabs keep local metrics.
- Performance: virtualize long lists; skeleton loading; optimistic UI for toggles; debounce search; cache last filters.

Security & Access

Recommended settings for production accounts.

- Enable MFA for all owners.
- Create a separate 'Service Account' for CI with scoped API keys.
- Rotate keys every 90 days; export audit log to SIEM.

+ Add Language

No languages configured yet.

Add Your First Language

Recommended setup

- Add base language (en).
- Add target languages (ar, es, pt).
- Define glossary for brand terms.
- Configure provider(s) for auto-translate.
- Create first build and export to app.
